VICTORY

Victory Refrigeration Introduces **Secure-Temp 1.0™** Technology

Secure-Temp 1.0™ technology is a monitoring and reporting system developed to offer a unique and reliable solution for all Foodservice facilities. Secure-Temp 1.0 is the only monitoring and reporting system in the industry that does not require additional costs for monthly monitoring services and software. This state-of-the-art system is offered as a standard feature with all Victory Refrigeration products at no additional charge.

Cutting-edge features provided by Secure Temp 1.0

- 24/7 monitoring and reporting of temperatures and product performance.
- No hard wiring necessary for this system that communicates via Wi-Fi.
- Easy to access software links to phones, tablets or computers from a cloud based portal.
- Instant alarm notification for up to 4 contacts via e-mail, phone, or text messaging to report temperature issues.
- Provides a preventative maintenance function that alerts operators of potential long term issues before immediate service is required.
- Quickly allows for instant reporting of temperatures during any given 24/7 period for HACCP and general inspection requirements or reports.
- Offers asset management tracking for recording models, serial numbers, warranty dates, and service records.
- Optional add on kits are available for walk-in coolers and freezers, dishwashers, and ice machines.

Key Advantages of Secure Temp 1.0

- **Alarm Notification**
-Eliminates the potential for spoilage of product.
- **Labor Savings**
-Eliminates need for hand-written data logs.
-Gathers and reports information automatically.
- **Preventative Maintenance**
-Tracks and notifies possible system failures.
