

HOBART FT1000e FLIGHT-TYPE DISH MACHINES

Efficient, Reliable, Innovative

With the Automatic Soil Removal (ASR) system, the FT1000e requires less operator pre-scrapping and eliminates the need to pre-rinse dishes. ASR also keeps wash tanks cleaner longer, maintaining machine performance throughout your shift and saving on the number of machine refills per day.

At 58 gallons of rinse water per hour, the FT1000e uses 50% less water than the previous Hobart flight-type model. And with 22% annual energy savings with optional Ventless technology, the FT1000e boasts the lowest total cost of ownership in the industry.

FT1000e MODEL COMPARISON

	FT1000e Base	FT1000e Energy Recovery	FT1000e Advansys BD
Rinse Rate, Gal./Hr.	58	58	58
Dishes per Hour	10,611-14,316	10,611-14,316	10,611-14,316
