

HOBART CLeN CONVEYOR-TYPE DISH MACHINES

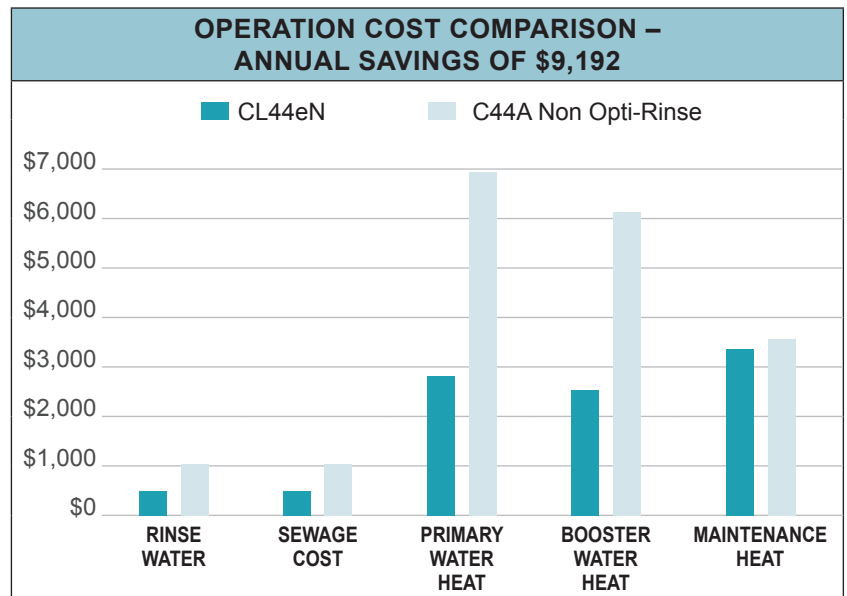

The most efficient use of energy, water, labor and floor space of any conveyor warewasher in the industry.

Hobart's CLeN Warewasher turns dish washing into a science, using industry-leading technology to rack up more clean dishes in less time. Available in CLeN Base, CLeN Energy Recovery, and CLeN Advansys models, the CLeN is your clearest choice.

- Exclusive NSF rated "intelligent" Pot & Pan mode extends wash times, reducing the need for pre-soaking.
- Programmable de-lime alert, reduces unnecessary de-liming saving money on chemicals and extends the life and durability of your machine.
- Drain Water Energy Recovery (DWeR) models provide up to 20% energy savings over the CLeN series and also temper the drain water, saving 90% on cold water usage.
- Automatic Soil Removal (ASR) Advansys models actively remove food soil that was missed during pre-scrapping, keeping the wash water cleaner and for longer periods of time saving money on chemicals, water and energy.

**OPERATION COST COMPARISON –
ANNUAL SAVINGS OF \$9,192**

Hobart's exclusive Opti-Rinse technology saves more than 50% in rinse water and energy over those models without Opti-Rinse. Depending on the size of the operation and number of hours the machine is used, average annual savings can add up to a total of \$9,192.
