

EGRO BYO

The EGRO BYO (Bring Your Own) is a high volume super-automatic espresso machine with an app-controlled user interface. The innovative user interface is as simple as using your smart phone. The Egro BYO uses an Android tablet as a fixed screen on the machine, or as an external device to interact remotely with the machine through Bluetooth technology. The BYO app adjusts to the screen dimension of your tablet and characteristics can be customized to provide operational solutions in a flexible format. The machine is made of stainless steel and ABS plastic and features patented milk rinsing technology that rinses the entire system with cold water and air. Milk is pumped from the side refrigerator with a push of one button.

- Includes Samsung™ tablet and mounting bracket
- Single milk pump system
- Set different milk temperatures and textures for each drink
- Centralized hot water
- Americano bypass enables machine to deliver authentic Americanos into a single cup

EGRO ONE

High volume fully automatic espresso machine with touchscreen user interface and stainless steel 18-gram patented brew group. Includes dual grinders made by Ditting™. Machine is made of stainless steel and ABS plastic and features an easy 3-step automatic daily cleaning program. The ONE features the most durable brewing technology available in its class of equipment. The patented stainless steel brewing group features advanced sealing technology which requires less maintenance visits and reduces the cost of ownership.

- Standard 5.7" touchscreen graphic display in full color user interface enables up to 48 drink selections
- Single milk pump system
- Centralized hot water
- Americano bypass enables machine to deliver authentic Americanos into a single cup

RANCILIO CLASSE 7

The Classe 7 is a traditional espresso machine model designed to take the market by storm with a strong personality, absolute reliability, sleek lines and the most innovative features in its class. Made from top-of-the-range materials such as highly polished stainless steel and thermoplastic composites in injection molded ABS and nylon. Available in 2 group or 3 group models in Anthracite Black or Ice White.
